## SUMMARY

An active young man with over three years of experience as a Software Developer, I am passionate about developing innovative technology. My skills include attractive Web Development and Ui design, as well as having valuable experience developing Android applications. I am currently seeking an opportunity to further develop my skills and gain real-world experience in the field of website developer through an internship program. I have a strong desire to continue learning and adapting to the latest technological developments, as well as collaborating in creative and professional teams.

## EXPERIENCE

**Frontend Developer**                                                        03/2023 - 05/2023
Creating an Online Examination Website for Nur-Hikmah school

The school asked me and the team to create a system that aims to facilitate the school in the process of accepting new students, and we created an Online Examination Website. Tools used:

- Laravel framework
- Bootstrap 5
- Filament
- Mysql
- Github

**Web Developer**                                                            01/2023 - 05/2023
IDN Boarding School

Built 10+ website projects with variety of programming languages and frameworks. Some of which is :

- HTML, CSS, and Javascript
- Bootstrap & TailwindCSS as the front-end framework
- PHP Laravel & Filament as the database & back-end framework

**Major Division**                                                            11/2021 - 02/2023
Student Council of IDN boarding school

As the Head of the Jurusan Division at IDN Boarding School, I had an absolutely amazing time being part of the OSIS team in school. Following the organization made me learn and shape my character in leadership skills, collaboration, adaptation. Let me tell, one of the absolute highlights was when I got the chance to organize a super awesome event called Taaruf Jurusan or Taarufbray. And other events I participate in.

**SponsorShip Committee**                                                     08/2022 - 09/2022
IDN It-Fest 2022

As a member of the sponsorship committee for the idn it-fest competition, I am in charge of managing partnerships with dicoding, potato course, and disa cloud companies.

**IDN Teaching Monthly**                                                      04/2022 - 04/2022
IDN Brings Good Impact

Sharing knowledge with other people is something that makes me feel happy, because apart from being able to help, it can also

challenge me to try. And teaching is one of the best methods in learning. Because, You have to understand what you're teaching for you to teach people. I teach material about:

- HTML
- Vanila CSS
- Javascript
- Bootstrap
- Git

**Tech talk about slicing ui with flutter**                                                        04/2022 - 04/2022
Weekend Tech Talk Series

At this interesting event, I had the opportunity to be a speaker and share my interesting experiences as well as discuss how to start creating applications using Flutter.

**Mobile Developer**                                                        01/2022 - 04/2022
Kotlin & Flutter

- Writing a Kotlin book about an application project that I have made (We - Muslim 2.0), themed about Islamic activities. this app uses: shared preference authentication, recyclerview, carousel, viewpager.
- Nesion, create a news application about technology and this app uses: Motion layout, Firebase authentication, Retrofit2, ViewModel, Glide, MVVM, Navigation Component.
- Chatt App, build an app using firebase to connect user to another user or real time feature. I am using flutter for this project.

## EDUCATION

**Frontend developer**                                                        2024
IDN Bs Senior High School

## CERTIFICATES

**Dicoding Basic JavaScript Programming**                                                        10/2022 - 10/2025
